

**GIORGETTI**

**OPEN AIR 2026**

Feel the breeze with Giorgetti

**EN** — At the threshold between indoors and outdoors, design meets nature.

This is where **Open Air** is born — the Giorgetti collection conceived to embrace the outdoors with the same intensity, elegance, and quality that have always defined our interior spaces.

In a harmonious dialogue between beauty and durability, form and function, Giorgetti brings its design philosophy outdoors, through refined materials, sartorial craftsmanship, and details that express a truly Italian savoir-faire.

Selected woods, treated metals, and technical fabrics with sophisticated textures: every choice is made to gracefully withstand even the most demanding environments, without ever compromising on aesthetics.

Open Air is more than a collection — it is an invitation to rediscover suspended time, the lightness of a gesture, the pleasure of inhabiting the natural world with pieces that speak the language of timeless comfort and beauty.

Since 2017, developed in collaboration with renowned designers such as Carlo Colombo, Ludovica + Roberto Palomba, and Chi Wing Lo.

**IT** — Al confine tra interno ed esterno, il design incontra la natura.

È lì che nasce **Open Air**, la collezione Giorgetti pensata per vivere all'aperto con la stessa intensità, eleganza e qualità che da sempre contraddistinguono i nostri spazi indoor.

In un dialogo armonioso tra bellezza e resistenza, tra forma e funzione, Giorgetti porta all'esterno la sua visione progettuale, fatta di materiali nobili, lavorazioni sartoriali e dettagli che raccontano un sapere autenticamente italiano. Legni selezionati, metalli trattati, tessuti tecnici dalle texture ricercate: ogni scelta è pensata per affrontare con grazia anche gli ambienti più estremi, senza mai rinunciare all'estetica.

Open Air non è solo una collezione: è un invito a riscoprire il tempo sospeso, la leggerezza di un gesto, il piacere di abitare lo spazio naturale con oggetti che parlano la lingua del comfort e della bellezza senza tempo.

Dal 2017 in collaborazione con firme d'eccellenza come Carlo Colombo, Ludovica+Roberto Palomba e Chi Wing Lo.

Technical

Aldia

OPEN AIR 2026

**Aldia** Designer: Carlo Colombo

Divano modulare, poltrona e pouf per esterni con struttura in metallo verniciato finitura Pewter (fin.5L).

I moduli del divano e la poltrona sono caratterizzati da schienale e braccioli in multistrato di betulla ricomposto disponibile nelle finiture, naturale (3A) e grigio chiaro (3G). I cuscini seduta, braccioli e schienale sono in poliuretano espanso e fibra rivestiti con fodera waterproof. Il rivestimento con tessuti della collezione Open-air è completamente sfoderabile.

I moduli del divano possono essere usati singolarmente o aggregati per creare composizioni, intervallati da altri elementi quali pouf e tavolini. Piedini regolabili in altezza. Si consiglia la copertura in caso di pioggia.

Modular sofa, armchair and pouf for outdoor use with structure in painted metal with Pewter finish (fin.5L) and adjustable feet.

The modules of the sofa and armchair feature backrests and armrests in reconstituted birch plywood available in the finishes natural (3A) and light grey (3G).

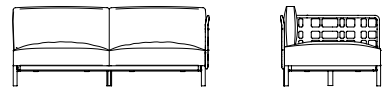

The seat, armrest and backrest cushions are made of polyurethane foam and fibre covered with a waterproof cover. Covers with fabrics from the Open-air collection are completely removable.

The sofa modules can be used individually or combined to create compositions, interspersed with other elements such as poufs and coffee tables. Height-adjustable feet.

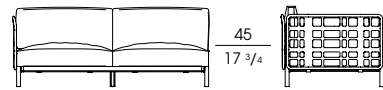

Covering is recommended in case of rain.

# Alisea

**Alisea**

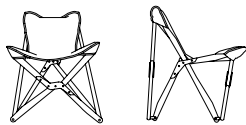

Designer: Giorgetti R&amp;D

Compagna ideale per i momenti all'aperto, la sedia Tripolina pieghevole e trasportabile Alisea unisce eleganza e praticità.

Realizzata in teak massello, presenta componenti in acciaio inossidabile AISI 316L e dettagli raffinati. Il tessuto outdoor è completamente personalizzabile e può essere scelto all'interno della gamma della collezione Open-Air. Inoltre, un profilo in pelle grigio chiaro impreziosisce tutte le cuciture e i dettagli. Leggera e versatile, trasforma ogni ambiente in un angolo di stile e comfort.

A perfect companion for outdoor moments, the Alisea foldable and portable Tripolina chair combines elegance with practicality.

Crafted in solid teak wood, it features components in stainless steel AISI 316L and refined detailing. The outdoor fabric is fully customisable and can be chosen within the Open-Air collection range. Furthermore, a light grey piping refines all the stitching and details. Lightweight and versatile, it transforms every setting into a stylish and comfortable retreat.

Apsara

OPEN AIR 2026

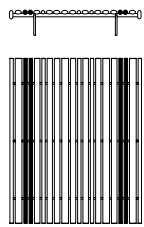

## Apsara Designer: Ludovica + Roberto Palomba

Sistema di sedute componibile in due profondità, con la base in alluminio protetto, verniciato a polvere color carruba, formata da doghe in legno di afrormosia che si alternano ad altre in alluminio. La struttura dei braccioli e degli schienali è in multistrato marino e acciaio verniciato a polvere. I cuscini seduta, braccioli e schienale sono in poliuretano espanso e fibra rivestiti con fodera waterproof. Il rivestimento con tessuti della collezione Open-air è completamente sfoderabile, con profilo in tessuto tecnico da esterni idrorepellente con colore a scelta. Tavolini in acciaio rotondi, quadrati e rettangolari, con piano in Peltrox® o in pietra lavica dell'Etna, freestanding o da fissare alla struttura della base, completano il progetto. Due perni in acciaio inox permettono di posizionare le parti imbottite e i tavolini sulle doghe in alluminio della base, rendendole removibili e posizionabili in diverse profondità. Lo schienale è disponibile anche in versione con movimento reclinabile.

Si consiglia la copertura in caso di pioggia.

Modular seating system available in two depths, with the base in protected aluminium, powder painted in carob colour, made up of afrormosia wooden slats, alternated with others in aluminium. The frame of the armrests and backrests is made of marine plywood and steel with a powder coated finish. Armrest and backrest cushions are expanded polyurethane and fibre with a waterproof cover. The upholstery, with fabrics from the Open-air collection, is completely various colour shades. Small round, square and rectangular tables in steel, with the top available in Peltrox® or in Etna lava stone, are available either freestanding or to be fixed to the base frame. Two stainless steel pins enable to position the different padded parts and the small tables on the aluminium slats of the base, so that they can be removed and positioned at different depths. The back is also available with a reclining movement.

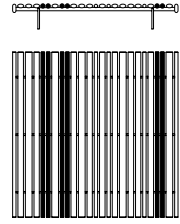

Covering is recommended in case of rain.

OPEN AIR 2026

**Fragmentum** Designer: Giorgetti R&D,  
Giancarlo Bosio

Fragmentum si propone come trait d'union tra ambienti indoor e outdoor, annullandone le barriere e le restrizioni di utilizzo. Inoltre, la forma irregolare consente di accostare più elementi, offrendo infinite possibilità compositive per adattarsi a contesti diversi.

Le cinque piastrelle in vetro leggermente ondulato, proposte nella colorazione fissa bianco retro verniciato, definiscono un design essenziale e modulare. La struttura, realizzata in Acciaio Inox AISI 316L, garantisce solidità e resistenza, con elementi cilindrici calibrati a seconda della posizione orizzontale o verticale, assicurando equilibrio e leggerezza visiva. Progettato per ambienti indoor e outdoor, questo tavolino unisce estetica contemporanea, modularità e performance tecnica in un unico oggetto distintivo.

Fragmentum acts as a bridge between indoor and outdoor spaces, dissolving boundaries and expanding possibilities of use. Its irregular shape allows multiple elements to be combined, offering endless compositional arrangements to suit a variety of settings.

The five slightly undulated glass tiles, presented in a fixed rear-lacquered white finish, define a modular and minimalist design. The structure, crafted from AISI 316L stainless steel, ensures solidity and durability, with elements calibrated according to their horizontal or vertical position, providing balance and visual lightness. Designed for both indoor and outdoor environments, this table combines contemporary aesthetics, modular versatility, and technical performance in a single distinctive piece.

Moorea

OPEN AIR 2026

## Moorea Designer: Carlo Colombo

Un sistema modulare realizzato con una meticolosa ricerca di materiali per esterno, che consente di soddisfare diversi tipi di esigenze e contesti.

L'intera struttura è in acciaio inox AISI 316L, verniciato verniciato Pewter (fin.5L), finitura che garantisce una continuità stilistica con le diverse collezioni e al tempo stesso dona al materiale un aspetto più caldo e tradizionale. L'acciaio inossidabile, classificato AISI 316L, è scelto per garantire una particolare resistenza alla corrosione in diversi ambienti, grazie alla composizione degli elementi di lega principali. Al fine di assicurarne l'affidabilità, anche gli elementi di fissaggio meccanico tra le parti sono in acciaio inossidabile.

La struttura è arricchita da elementi in legno massello di Teak (*Tectona grandis*), in finitura naturale, un legno particolarmente pregiato, per le sue qualità tecniche ed estetiche.

La cuscineria, a quote differenziate, è realizzata in gomma drenante a celle aperte, consentendo all'acqua e all'umidità di passarvi attraverso e riducendo significativamente i tempi di asciugatura. Rivestito con tessuti della collezione Open-air, è completamente sfoderabile.

Si consiglia la copertura in caso di pioggia.

A modular system made with an extremely high standard of materials for outdoor use, to meet different needs and contexts.

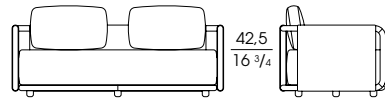

The entire structure is made of AISI 316L stainless steel, Pewter painted (fin.5L), which guarantees stylistic coherence with the different collections and at the same time gives the material a warmer, more traditional look. The stainless steel, classified AISI 316L, is chosen to guarantee a particular resistance to corrosion in different environments, thanks to the composition of the main alloy elements. In order to ensure reliability, the mechanical fasteners between the parts are also made of stainless steel.

The structure is enriched with solid Teak wood elements (*Tectona grandis*) in a natural finish, a wood that is highly esteemed for its technical and aesthetic qualities.

The upholstery, with multi-densities foam, is made of open-cell draining rubber, allowing water and humidity to pass through and significantly reducing drying time.

Upholstered with fabrics from the Open-air collection, it is completely removable.

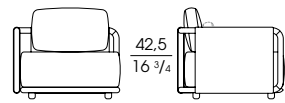

Covering is recommended in case of rain.

Seduta progettata con una meticolosa ricerca di materiali per esterno, che consente di soddisfare diversi contesti.

La struttura è in acciaio inox AISI 316L, verniciato Pewter (fin.5L), finitura che garantisce una continuità stilistica con le diverse collezioni e al tempo stesso dona al materiale un aspetto più caldo e tradizionale. L'acciaio inossidabile, classificato AISI 316L, è scelto per garantire una particolare resistenza alla corrosione in diversi ambienti, grazie alla composizione degli elementi di lega principali. Al fine di assicurarne l'affidabilità, anche gli elementi di fissaggio meccanico tra le parti sono in acciaio inossidabile.

Lo schienale, tutt'uno con i braccioli è in legno massello di Teak (*Tectona grandis*), in finitura naturale, un legno particolarmente pregiato, per le sue qualità tecniche ed estetiche.

La cuscinatura della seduta è realizzata in gomma drenante a celle aperte, consentendo all'acqua e all'umidità di passarvi attraverso e riducendo significativamente i tempi di asciugatura.

Il design della seduta è stato studiato con opportune forature che garantiscono l'aerazione della zona imbottita e la sua relativa asciugatura.

La cuscinatura dello schienale, fissato alla struttura tramite cernira, è anch'esso in gomma drenante a celle aperte.

Rivestito con tessuti della collezione Open-air, è completamente sfoderabile.

Si consiglia la copertura in caso di pioggia.

—  
Chair designed with an extremely high standard of materials for outdoor use, to meet different contexts. The entire structure is made of AISI 316L stainless steel, Pewter painted (fin.5L), which guarantees stylistic coherence with the different collections and at the same time gives the material a warmer, more traditional look. The stainless steel, classified AISI 316L, is chosen to guarantee a particular resistance to corrosion in different environments, thanks to the composition of the main alloy elements. In order to ensure reliability, the mechanical fasteners between the parts are also made of stainless steel.

The backrest, one with the armrests, is made in solid Teak wood elements (*Tectona grandis*) in a natural finish, a wood that is highly esteemed for its technical and aesthetic qualities.

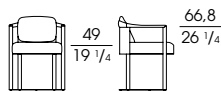

The seat upholstery is made of open-cell draining rubber, allowing water and humidity to pass through and significantly reducing drying time.

The seat design has been developed with specific drain holes to ensure the ventilation of the padding area and its relative dryness.

The backrest cushion, fastened to the frame with a zip fastener, is also made of open-cell draining rubber.

Upholstered with fabrics from the Open-air collection, it is completely removable.

Covering is recommended in case of rain.

## Moorea Designer: Carlo Colombo

Tavoli disponibili sia in versione quadrata che rettangolare. L'intera collezione Moorea è progettata con una meticolosa ricerca di materiali per esterno, che consente di soddisfare diversi contesti. La struttura è in acciaio inox AISI 316L, verniciato Pewter (fin.5L), finitura che garantisce una continuità stilistica con le diverse collezioni e al tempo stesso dona al materiale un aspetto più caldo e tradizionale. L'acciaio inossidabile, classificato AISI 316L, è scelto per garantire una particolare resistenza alla corrosione in diversi ambienti, grazie alla composizione degli elementi di lega principali. Al fine di assicurarne l'affidabilità, anche gli elementi di fissaggio meccanico tra le parti sono in acciaio inossidabile.

Le gambe sono in legno massello di Teak (*Tectona grandis*), in finitura naturale, un legno particolarmente pregiato, per le sue qualità tecniche ed estetiche. Il design della struttura è stato studiato con opportune forature che garantiscono un miglior sistema di scolo dell'acqua. Il piano, suddiviso in sezioni, realizzate secondo un rapporto aureo, è composto da lastre di pietra lavica dell'Etna, di sezioni differenti. La pietra lavica dell'Etna è trattata termicamente, per migliorare le caratteristiche tecniche e raggiungere una colorazione più tendente al grigio caldo. In una pre-selezione di lastre, viene spolverata della polvere di vetro colorata, che va parzialmente a riempire i pori che caratterizzano i primi strati della pietra lavica dell'Etna. La polvere di vetro, fondendosi, crea delle inclusioni che caratterizzano e arricchiscono la pietra stessa. Le colorazioni di vetro sono disponibili in tre varianti di colore: perla, ottanio, smeraldo. Si consiglia la copertura in caso di pioggia.

Tables available in both square and rectangular shapes. The whole Moorea collection is designed with an extremely high standard of materials for outdoor use, to meet different contexts. The entire structure is made of AISI 316L stainless steel, Pewter painted (fin.5L), which guarantees stylistic coherence with the different collections and at the same time gives the material a warmer, more traditional look. The stainless steel, classified AISI 316L, is chosen to guarantee a particular resistance to corrosion in different environments, thanks to the composition of the main alloy elements. In order to ensure reliability, the mechanical fasteners between the parts are also made of stainless steel. Legs are made in solid Teak wood elements (*Tectona grandis*) in a natural finish, a wood that is highly esteemed for its technical and aesthetic qualities. The structure design has been developed with specific drain holes to ensure a better water draining system. The top, divided into sections, made according to a golden ratio, is composed of slabs of lava stone from Etna, of different sections. The lava stone from Etna is heat-treated, to improve the technical characteristics and achieve a colouring more inclined to warm grey. A pre-selection of slabs is sprinkled with coloured glass powder, which partially fills the pores that characterise the first layers of Etna lava stone. The glass powder melts and creates inclusions that characterise and enrich the stone itself. Glass colours are available in three colour variants: pearl, teal, emerald.  
Covering is recommended in case of rain.

Letto progettato con una meticolosa ricerca di materiali per esterno, che consente di soddisfare diversi contesti.

La struttura è in acciaio inox AISI 316L, verniciato Pewter (fin.5L), finitura che garantisce una continuità stilistica con le diverse collezioni e al tempo stesso dona al materiale un aspetto più caldo e tradizionale. L'acciaio inossidabile, classificato AISI 316L, è scelto per garantire una particolare resistenza alla corrosione in diversi ambienti, grazie alla composizione degli elementi di lega principali. Al fine di assicurarne l'affidabilità, anche gli elementi di fissaggio meccanico tra le parti sono in acciaio inossidabile.

Inserti in legno massello di Teak (*Tectona grandis*), in finitura naturale, un legno particolarmente pregiato, per le sue qualità tecniche ed estetiche. Dotato di due ruote sulla testata per agevolare lo spostamento e, di un meccanismo manuale che permette la regolazione dello schienale in quattro posizioni diverse. Quest'ultima regolazione è agevolata da un'asola in Brisa (variante 5875 Nimbus).

La cuscineria è in gomma drenante a celle aperte.

Rivestito con tessuti della collezione Open-air, è completamente sfoderabile.

A sostegno del materasso, una struttura di doghe in polipropilene rinforzate con fibra di vetro, garantisce l'elasticità e la resistenza costante nel tempo.

Si consiglia la copertura in caso di pioggia.

Sunbed available in both square and rectangular shapes. The whole Moorea collection is designed with an extremely high standard of materials for outdoor use, to meet different contexts.

The entire structure is made of AISI 316L stainless steel, Pewter painted (fin.5L), which guarantees stylistic coherence with the different collections and at the same time gives the material a warmer, more traditional look. The stainless steel, classified AISI 316L, is chosen to guarantee a particular resistance to corrosion in different environments, thanks to the composition of the main alloy elements. In order to ensure reliability, the mechanical fasteners between the parts are also made of stainless steel.

Solid teak wood inserts of Teak (*Tectona grandis*) in a natural finish, a wood that is highly esteemed for its technical and aesthetic qualities.

Equipped with two wheels on the headboard to assist movement and a manual mechanism that allows the backrest to be adjusted to four different positions. The adjustment is facilitated by a loop in Brisa fabric (variant 5875 Nimbus).

The cushioning is in open-cell draining rubber.

Upholstered with fabrics from the Open-air collection, it has completely removable covers.

To support the mattress, a structure of fibreglass-reinforced polypropylene slats guarantees elasticity and constant resistance over time.

Covering is recommended in case of rain.
